

Archive2Anywhere Editions

- Symantec Enterprise Vault
- Symantec Enterprise Vault.Cloud
- Autonomy EAS
- EMC SourceOne
- EMC EmailXtender
- Mimosa NearPoint

Archive2Anywhere Benefits

- Fast deployment
- Full data fidelity migration
- Industry leading performance
- Legal and eDiscovery compliance
- Safely decommission legacy archive

PST Benefits

- Standard storage containers for Microsoft Exchange
- Offers mobility for email migration
- Supports ingestion by leading third party archiving solutions
- Secure storage of sensitive data for eDiscovery
- Available with all editions of Archive2Anywhere

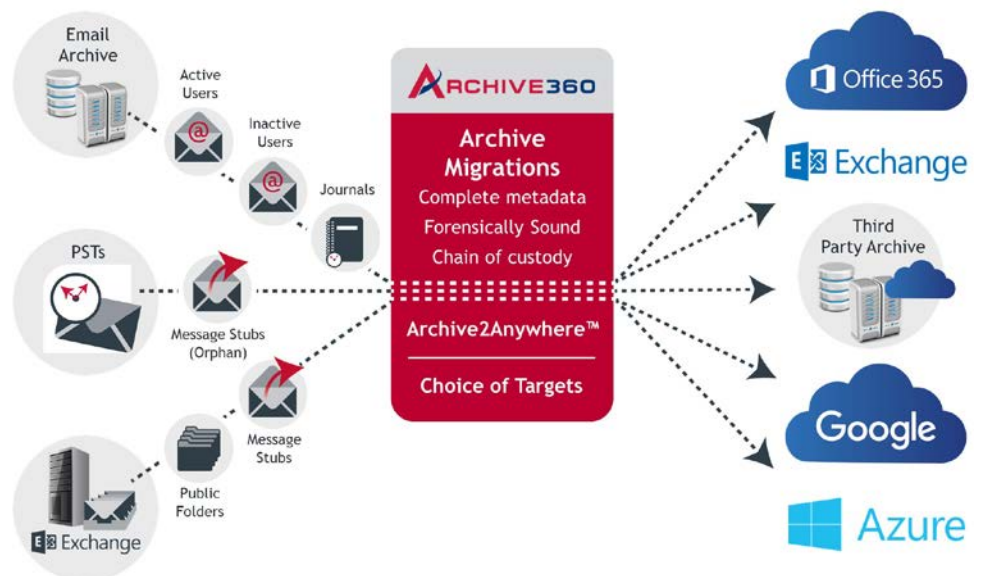

Microsoft Exchange PST Files and Archive Migration

Your organization has relied on an email archiving solution to manage the size of your mailbox, for compliance or to support your litigation and eDiscovery needs. The manufacturer of your email archiving software has gone out of business, been purchased, or dropped support. Much of your users' mail has been stubbed or shortcut. You want to implement a new email archiving solution but are concerned about what to do with the terabytes of email stored in your legacy archive. Your migration plan includes decommissioning your legacy email archive and migrating your archived mail to PST files for transfer to a new archive.

Introducing Archive2Anywhere™

Archive2Anywhere™ is the industry-standard email archive migration solution designed specifically to work with Microsoft Exchange. Archive2Anywhere exports legacy archive content into standard Exchange PST files for transfer to 3rd-party email archives. Archive2Anywhere migrates legacy email archive data directly into Exchange PST files with complete, original message fidelity.

- Creates 100% Microsoft Compliant PST standard files and does not use 3rd-party components.
- Restores all mailbox contents including, email, calendar, notes, contacts, journal and custom Message Classes.
- Full Exchange folder structure synchronization when stub rehydration is used.
- Source Message ID to PST Message ID chain of custody and reconciliation reporting.
- PST file size is configurable for easier file handling and ingestion.

Deployment and Administration

Deployment and administration of Archive2Anywhere is fast and easy; the product deploys in less than 30 minutes. Its rich graphical user interface allows users to quickly review the archived user reports and perform data extractions at a click of a button.

High Performance Extraction and Conversion

Data extractions are extremely fast and limited only by the target repository. Archive2Anywhere is capable of running over 40 parallel mailbox extractions on a single server. Typically, Archive2Anywhere performs at a rate of 7.2+ TBs per day for locally stored PST files based on average message size of 200 KB.

EDiscovery and Regulatory Compliance

Archive2Anywhere extracts and copies all data in a forensically sound and legally defensible manner. The proof is in our performance – in 2015 we processed and migrated email data for 2.2 million users totaling 80 billion messages with a 99.999% success rate.

Consolidation of Exchange Shortcuts and Stubs

Email archiving solutions usually remove emails and attachments from Exchange to reduce mailbox size, leaving a pointer (called a stub or shortcut) behind pointing to the archive. Only Archive2Anywhere has the ability to remedy this very difficult situation. Archive2Anywhere queries the Exchange Server to determine the number of stubs in each user's mailbox and systematically matches message stubs in Exchange with archived messages in the archive.

About Archive360

Archive360 is the leader in email archive migration software, successfully migrating more than 10 petabytes of data for more than 500 organizations worldwide since 2012. Archive2Anywhere™, the company's flagship product, is the only solution in the market purpose-built to deliver consistently fast, predictable migration rates, with verifiable data fidelity and defensible chain of custody reporting. A global organization, Archive360 delivers its solutions through a network of specialist partners.
