

Archive360 Discovery Workshop

Trends in Email Archiving

Your email archiving environment is changing; your current product no longer meets your needs, your on premise solution has been acquired by another vendor, or the product is no longer supported. Or you are considering cloud-based archiving, maybe as part of a move to Microsoft Office 365.

Migration Considerations

One of the key migration challenges for organizations continues to be what to do with their existing archives. Some choose to migrate nothing, impacting users and creating potential regulatory and legal issues. Others migrate the entire archive, a costly option that fails to address the needs of users or legal and regulatory teams. Before deciding what to do with your current email archive or commencing a migration project, Archive360 recommends completing a pre-migration checklist. However, in order to do so, you will first need to assess and analyze the contents of your email archive.

Email Archive Pre-Migration Checklist

- How much data do I have? What kind of data is it?
- Is any of it of value to my organization?
- What about regulatory retention or eDiscovery requirements?
- How much data is from inactive users?
- Are my users affected if I move or delete MS Exchange stubs/shortcuts?
- Do I need to migrate the entire archive and journal archive?

Archive360 Discovery Workshop

Archive360 has developed its Discovery Workshop to help organizations quickly and accurately analyze their email archives. The Discovery Workshop is based on helping more than 450 organizations worldwide successfully migrate in excess of 10 petabytes of archived data. Within hours you can:

Archive Discovery	Sele..._Mail...	User Name	SAM Account	Mail	All Count	Compressed Size...	Uncompressed Size...
1306					24,561,410	3,410,591	1,070,652

Figure 1. Archive Discovery Report

- Accurately assess the size and content of your archive by user.
- Assess and scope with precision messages that have been stubbed (shortcut) by user and date.
- Investigate the Journal mailbox and comprehensively report on Journal data by custodian.
- Evaluate and validate Archive2Anywhere™ against sample archived messages.
- Make informed decisions regarding your migration strategy and priorities – which mailboxes/ messages to migrate, in what order.

Archive360 Discovery Workshop Functionality

Archive360 Discovery Workshop is currently available for the following email archives: Autonomy Zantaz EAS, EMC SourceOne, EMC EmailXtender, Mimosa NearPoint, Symantec Enterprise Vault.

Archive Discovery	Stub/Shortcut Discovery in MS Exchange/Office365	Journal Discovery
<input type="checkbox"/> User details	<input type="checkbox"/> Number of stubs/shortcuts per user	<input type="checkbox"/> Custodian details
<input type="checkbox"/> Messages per user	<input type="checkbox"/> Total size of shortcuts per user	<input type="checkbox"/> Messages per custodian
<input type="checkbox"/> Total size per user	<input type="checkbox"/> Data range analysis of stubs/shortcuts	<input type="checkbox"/> Total size per user
<input type="checkbox"/> Total size of archive (uncompressed)		<input type="checkbox"/> Total size of journal
<p>Proof of concept</p> <p>Test extraction up to 5 mailboxes or 500 GB to PST, MS Exchange, Office 365, Gmail</p>		

Archive360 Discovery Workshop Benefits

- Assess your current email archive and test your migration quickly, with no risks and minimal up-front investment.
- Reduce the time and cost of your migration project, while increasing the predictability.
- Reduce archiving costs post-migration – through elimination of duplicates, document revisions, etc.
- Accelerate ability to migrate from legacy email archive, reducing costs.
- Stubs – understand potential impact on end user experience BEFORE migrating their archived mail.
- Journals – migrate only custodians that need to be moved, saving time and costs during and after the migration project.

About Archive360

Archive360 is the leader in email archive migration software, successfully migrating more than 10 petabytes of data for more than 450 organizations worldwide since 2012. Archive2Anywhere™, the company's flagship product, is the only solution in the market purpose-built to deliver consistently fast, predictable migration rates, with verifiable data fidelity.
