A.I. Enabled Information Governance for Powerful Search, Classification, and Analytics

The cloud has quickly become the preferred option for information storage and management for companies that are struggling with storing and managing the vastly growing volume of information. In addition, companies lack adequate management capabilities to meet their organization's legal, regulatory and business requirements. Archive2Azure unlocks the value of your data through powerful analytics, A.I. enabled information categorization, and powerful records management capabilities.

Cost Savings

- Single vendor solution
- Predictable costs based on PaaS model
- Data is stored and managed in *your* low-cost Azure Cloud
- Data portability – no more migrations or ransoms

Regulatory Compliance

- Flexible/granular data management policies
- Supports all major regulatory requirements
- Powerful audit and reporting
- Auto-categorization
- Customizable for your specific Information Management needs

Search, Analytics, Security

- Configurable, indexable, and scalable search
- Intelligent data analytics
- Bring your own encryption keys
- Elastic search more control over your queries
- Granular access controls
- Graphical analytics for better data insights

Archive2Azure Benefits:

- ✓ Utilize your low-cost Azure tenancy
- ✓ Store data in its native format
- ✓ Retain ownership of your data
- ✓ Reduce legal risk
- ✓ Avoid vendor lock-in
- ✓ Performance on demand

SaaS

Archive2Azure allows companies to migrate away from expensive on-premise data management solutions to the Azure Cloud. By utilizing Azure *plus* Archive2Azure, you retain direct ownership of your data - something the "one size fits all" SaaS model (versus Archive2Azure's PaaS model) cannot do.

Once your data is onboarded into your Azure Cloud and Archive2Azure, expensive and time-consuming data migrations will be a thing of the past. Overall, the Archive2Azure platform gives you more control of your information management and compliance responsibilities, better automation capabilities, while saving you significant costs.
