Archive2Azure™

The world’s most scalable, secure, intelligent archiving platform, powered by Microsoft Azure

Compliant archiving, records management, and eDiscovery—accessible, flexible, and 100% under YOUR control, in YOUR Azure cloud

Your organization is producing massive volumes of data year over year, which must be managed, classified, securely stored, accessible and searchable in line with your compliance requirements, legal discovery obligations, and records management policies.

Why Archive2Azure

Archive2Azure is the first intelligent, open-standard archive designed specifically to reduce the costs (by as much as 90%) and risk of classifying, storing and managing massive volumes of data while meeting complex legal and regulatory requirements.

Archive2Azure’s use of tiered Azure Blob Storage, WORM storage, Machine Learning, AI, and Cognitive Services will transform how organizations worldwide archive and manage their data to address their business requirements.

Integrated, Open-Standards Platform

Archive2Azure manages and stores all your data (including metadata), in its native format in YOUR Azure tenant. You always control your data, your infrastructure and information security. Customer use cases include content-aware migration of third-party archives (including journal data), data validation and classification, journal archiving from Exchange or Office 365, compliance archiving and information management for Microsoft Teams, file shares, SharePoint and OneDrive, CRM, ECM data, records management with taxonomy, legal holds and disposition, e-discovery with scalable enterprise search capabilities.
Military-Grade Security and Access Control

• Content and context-aware Security Gateway encryption (in transit/at rest) delivers the highest levels of data security and automatically supports your data classification, taxonomy and data management requirements.
• Encryption and key-management delivered on-premises and in the cloud address the most stringent data privacy and protection requirements.
• Customer-controlled and customer-managed encryption keys further protect your data and ensure no vendor lock-in.
• Secure and audited data access and role-based access control.

Compliance Archiving & the Power of PaaS

• Zero vendor lock-in! Ensure you always retain control and ownership of your data. Unlike SaaS-based solutions, all data is stored in your tenant in your private cloud.
• All Teams conversations (one-to-one, group and channel communications, as well as files and content), are appropriately archived to meet in-country data residency and disposition requirements.
• Control costs via scalability on demand – use (and pay for) only what your need.
• Full support for policy-driven tiered storage and WORM/SEC compliant immutable storage.

AI-Powered Content Scanning & Tagging

• Leverage the power of integrated Artificial Intelligence with predictive scanning classification and tagging of your content BEFORE archival.
• Content-aware protection of sensitive data actively managed through both content and context inspection.
• Ensure compliance with external privacy regulations (i.e. GDPR, CCPA, HIPAA, PCI-DSS, and others) as well as internal policies.

AI-Powered Supervisory Review

• Intelligent, AI-powered support of your FINRA Rule 3110 and NYSE Rule 342 supervisory review requirements.
• Automated alerts if policy violations detected.

AI-Powered Analytics, Search, e-Discovery

• On-demand data analytics and intelligent search to help with cost control.
• Identify and investigate data trends, expose risks, mitigate fraud and liability.
• Meet complex eDiscovery and legal hold/case management requirements.

About Archive360

Archive360 is the enterprise information archiving company that businesses and government agencies worldwide trust to securely migrate their digital data to the cloud, and responsibly manage it for today’s regulatory, legal and business intelligence obligations. This is accomplished by applying context around the search, classification, and indexing of data including files, videos, and emails - all while allowing organizations to maintain full control over privacy, access, and compliance. Archive360 is a global organization that delivers its solutions both directly and through a worldwide network of partners. Archive360 is a Microsoft Cloud Solution Provider, and the Archive2Azure™ solution is Microsoft Azure Certified. To learn more, visit www.archive360.com.
