Automate, Secure, and Simplify Archive Migrations to Office 365 and Azure

Migrating large data sets from disparate, legacy archives to Office 365 and Azure can be an expensive, time consuming, and complex task.

FastCollect takes the risk out of data migration to the Microsoft Cloud by providing 80 plus connectors for migrating a huge variety of structured, semi-structured, and unstructured data. FastCollect provides for the fast, secure, and trouble-free movement of data from

on premise and cloud repositories to the Microsoft Cloud in a legally defensible manner. FastCollect for Archives makes it easy to quickly achieve accurate, efficient and secure data migrations. Designed to tightly integrate with existing archive storage solutions, FastCollect operates at the object-level to collect and move all your archived information, including meta-data.

Compliant Migration

- Support for unlimited data types
- Complies with SEC, GDPR, and MiFID II rules
- Fully audited and reportable

Wide Range of Connectors

- 80+ data connectors so you can migrate a huge number of application of workloads, instead of just email

Centralized Management

Control the entire extraction and ingestion process, including extraction rules, export targets, and reporting, through a single, intuitive, easy-to-use web-based interface.

FastCollect enables you to:

- ✓ Migrate information with 99.9% accuracy into the target solution
- ✓ Eliminate downtime and impacts on productivity
- ✓ Deliver legally defensible migrations that meet regulatory compliance mandates
- ✓ Avoid data loss and reduce risk while preserving message fidelity
- ✓ Maintain item-level audit trails and conduct comprehensive reporting
- ✓ Reduce costs and pay only for what you use, not by mailbox
