# ARCHIVE360 Federal

# Archive360 Extend Program

**Search, access, view and act on data managed in Archive360 from *your* application**

## Your Data in Your Cloud under Your Control

Archive360 ensures that Federal agencies can securely onboard, manage, retain and appropriately access large volumes of disparate data in the cloud – often petabytes. Legal, compliance and IT professionals rely on the Archive360 information management platform to provide full control over data security, privacy, access, and compliance.

### Archive360 Extend Program

Archive360 Extend developer program gives partners and customers access to our unique APIs (application programming interfaces) so they can leverage the power of our platform and extend the capabilities of existing commercial applications or customer in-house developed applications. With Archive360 Extend, users can now benefit from one search to directly access, manage and extract relevant data from the Archive360 archive in the comfort and familiarity of their preferred applications, while professionals in the legal, IT and compliance units are assured that all data is being appropriately managed.

### Extending Access to Data Managed within Archive360

Archive360 customers can extend the value of the data managed by our platform by seamlessly integrating with other enterprise applications on which their teams rely. Through our Extend program, Archive360 gives customers and partners the tools and support they need to enable business applications to access and manage data stored in the Archive360 archive, as well as control data transfer between systems using Archive360's REST APIs. Use case examples of customers and partners leveraging Archive360 Extend include:

- eDiscovery and "one search"
- eDiscovery and in place legal holds
- Data analytics
- Data reporting

### The API Factor

The key benefits of Archive360's APIs include:

- Geo Secure: They can run separate micro-APIs in the right place across on-premises, in-country or overseas cloud infrastructures (they are geo-location aware)
- PII Secure: They feature a built-in Security Gateway option
- Comprehensive: There's one front-end API for ingestion, operations, monitoring, admin, records, discovery, machine learning and analytics, along with micro-APIs
- Open: They are extensible—for example, Archive360's archive functionality can be seamlessly embedded into independent software vendors' applications and customer portals
- Scalable: They can manage petabytes of data, and dynamically scale horizontally and vertically to meet any workload.

## Extend Benefits

The key benefits of Archive360's APIs include:

- Geo aware
- Geo secure
- PII secure
- Comprehensive
- Open
- Extensible
- Scalable

## exterro®

## Extend Partner: Exterro

❝ As the role of the corporate legal department evolves and expands to meet growing legal governance, risk and compliance obligations, the ability to be able to quickly identify, preserve and respond to requests for data becomes critical. The level and ease of access to the vast amounts of data stored in the Archive360 platform delivered by this partnership ensures our joint customers can get to the facts of every matter quickly, defensibly and at lower costs, driving productivity and efficiency gains across their organization. We are thrilled to be working closely with Archive360 to deliver this solution to the market ❞

*Bobby Balachandran, Founder and CEO at Exterro*

## ⊞Relativity®

## Extend Partner: Relativity

❝ Relativity is an industry leader in the organization and management of sensitive customer data, and combining our capabilities with Archive360, a leader in archiving and information management, ensures customers have an integrated and secure information management lifecycle. The integrations, housed completely in Microsoft Azure's single-cloud environment, reflect our commitment to innovating with Microsoft Azure-based partners to deliver a much more seamless user experience. ❞

*Marcin Wojtczak, Chief Growth Officer at Relativity*

## About Archive360

Archive360 is the enterprise information archiving company that businesses and government agencies worldwide trust to securely migrate their digital data to the cloud, and responsibly manage it for today's regulatory, legal and business intelligence obligations. This is accomplished by applying context around the search, classification, security, retention, disposition and indexing of data including files, videos, and emails—all while allowing organizations to maintain full control over privacy, access, and compliance. Archive360 is a global organization that delivers its solutions both directly and through a worldwide network of partners. Archive360 is a Microsoft Cloud Solution Provider, and the Archive2Azure™ solution is Microsoft Azure Certified. To learn more, visit www.archive360.com.
