- Built-in eDiscovery, legal hold and export
- Automated retention policies for compliance
- Protect sensitive email data – automatically
- Availability across all devices

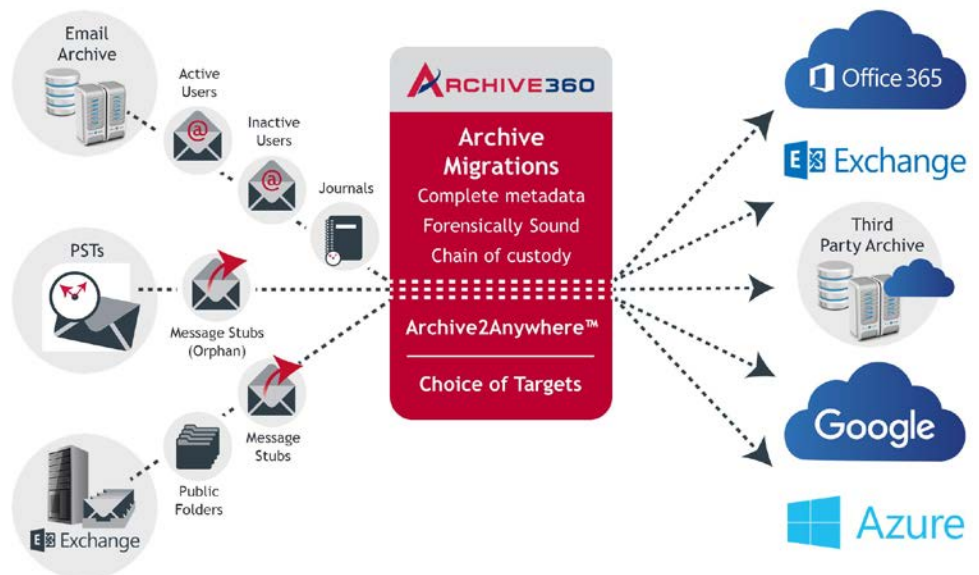

Microsoft Exchange PST Files and Archive Migration

Your organization is moving to Microsoft Office 365. You plan is to use Office 365 to archive your email as well as to manage your “live” email. Previously you relied on a third party archiving solution to manage mailbox size and to support your compliance and eDiscovery needs. You have terabytes of email stored in your legacy email archive and much of your users’ mail has been stubbed or shortcut. Your challenge is migrating terabytes of email content from your legacy email archive to Office 365.

Archive2Anywhere for Office 365 PST Import Service

Archive360 has developed an integrated delivery model to complement Microsoft’s newly announced Office 365 PST Import Service. This delivery model allows Archive360 to provide 100% accurate and fast migration of legacy email archive content contained in PST files to Office 365. By combining the Office 365 PST Import Service with the industry’s fastest archive extraction engine, 100 TBs of archived mail can be successfully migrated to Office 365 in under 30 days, with every message accounted for.

- Includes reconciliation and direct remediation of the imported PST files with Office 365.
- Speeds the migration process by avoiding duplicate processing; only non-reconciled messages are reprocessed.
- Preserves complete, original message fidelity and chain-of-custody for eDiscovery and compliance.

Service Highlights

- **Archive2Anywhere™** tags individual messages and provides message-level reporting during the entire PST migration process to support regulatory and legal compliance.
- Archive2Anywhere identifies non-reconciled (missing) messages and any missing emails are pushed from the source archive directly into Office 365. If a message cannot be processed, Archive2Anywhere provides detailed reporting of the missing messages for regulatory and legal purposes.

Service Benefits

- Archive2Anywhere satisfies regulatory and legal compliance needs by providing message-level chain-of-custody reporting of the entire PST migration process.
- Archive2Anywhere protects against data loss; 100% of the content from PST files is moved securely to Office 365 with complete audit reporting.
- Archive2Anywhere speeds the migration process by avoiding duplicate processing; only non-reconciled messages are reprocessed.

About Archive360

Archive360 is the leader in email archive migration software, successfully migrating more than 10 petabytes of data for more than 500 organizations worldwide since 2012. Archive2Anywhere™, the company's flagship product, is the only solution in the market purpose-built to deliver consistently fast, predictable migration rates, with verifiable data fidelity and defensible chain of custody reporting. A global organization, Archive360 delivers its solutions through a network of specialist partners.
