

Migrate Directly From

- Symantec Enterprise Vault
- Symantec Enterprise Vault. cloud
- Autonomy EAS
- EMC SourceOne
- EMC EmailXtender
- Mimosa NearPoint

Migrate To

- Office 365
- Microsoft Exchange personal archives
- Gmail with Google Vault,
- Third party email archives
- PST containers

Next-Generation Performance

- **PST target**  
7.2+ TB per day per server
- **Exchange On-Premise**  
5.0+ TB per day per server
- **Office 365**  
2.5+ TB per day per server
- **Gmail / Google Vault**  
600 GB per day per server  
(Google API throttle limit)

Archive2Anywhere for Email Archive Migration

Archive2Anywhere™ is the only email archive migration solution designed specifically to work with all leading email archiving solutions. Archive2Anywhere supports both EML and MSG formats and integrates tightly with the archive solution to ensure fast, forensically defensible email migration.

Chain of Custody and Compliance

Archive2Anywhere is designed to migrate legacy archive data at high speed, while maintaining 100% data fidelity and chain of custody. This ensure that the entire custodian-to-data relationship is maintained during every step of the migration process.

Zero Reliance on Native Archive APIs

Archive2Anywhere is a next-generation email archive migration platform that uniquely operates at the object level and does NOT use archive solution APIs. Extraction APIs are known for delivering migrations that are sluggish and inconsistent, and lack the defensible reconciliation reporting capability required in legal and regulatory situations. Archive2Anywhere assures the highest performance, most complete and legally defensible email archive migration available.

Integrated Stub/Shortcut Management and Rehydration

Archive2Anywhere delivers integrated stub or shortcut management and rehydration. Only Archive2Anywhere is uniquely able to find and reconcile Exchange stubs with the original archived messages, and remove leftover stubs from the Exchange server in a forensically defensible process.

Feature	Benefit
<b>Fast installation and deployment</b>	Start your migration process quickly. Typical installation is up and running in less than 30 minutes.
<b>High performance extraction and scalability</b>	Data extractions are fast, limited only by the target repository. Typically, Archive2Anywhere performs at a rate of over 5+ TBs per day, based on average message size of 200 KB.
<b>Full Compliance and eDiscovery</b>	Archive2Anywhere is capable of complete, original message fidelity providing defensible response to eDiscovery orders and regulatory information requests.
<b>Data Fidelity and Message Selection Criteria</b>	Archive2Anywhere extracts raw messages and attachments including all metadata and reconstitutes them into the original Exchange MSG format for “error-free” data extraction.
<b>Flexible Options for Message Migration and Export</b>	Archive2Anywhere migrates directly to Exchange Personal Archive, Office 365 and Gmail with Google Vault. Archive2Anywhere can also export to PST files for eDiscovery and/or for input into 3 <sup>rd</sup> -party email archives.
<b>Automated Exception Handling</b>	Archive2Anywhere is capable of restoring corrupted emails and creating a valid MSG file.
<b>Audit Trail &amp; Reconciliation</b>	Archive2Anywhere maintains a detailed audit trail for compliance and reporting.
<b>Intuitive Graphical User Interface</b>	Archive2Anywhere is designed to remove the usual complexity: the entire migration process is operated using an intuitive Graphical User Interface (GUI) that controls extraction rules, export targets, and reporting.

## About Archive360

Archive360 is the leader in email archive migration software, successfully migrating more than 10 petabytes of data for more than 500 organizations worldwide since 2012. Archive2Anywhere™, the company’s flagship product, is the only solution in the market purpose-built to deliver consistently fast, predictable migration rates, with verifiable data fidelity and defensible chain of custody reporting. A global organization, Archive360 delivers its solutions through a network of specialist partners.
