5.0+ TB per day per server
- **Office 365**  
2.5+ TB per day per server
- **Gmail / Google Vault**  
600 GB per day per server  
(Google API throttle limit)

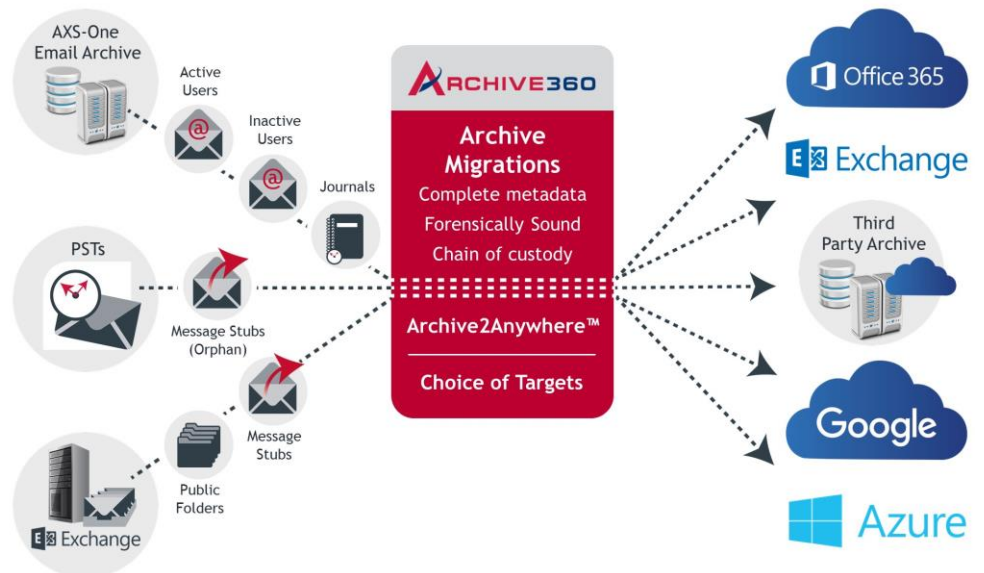

**Migrating from AXS-One**

Your organization has relied on AXS-One’s email archiving software to manage your Exchange mailbox size, as well as for compliance and eDiscovery. Today, however, your AXS-One archiving solution no longer meets your business needs; your organization is moving to a cloud-based email system such as Office 365 or Gmail. Or you are concerned about owning unsupported or obsolete technology; since 2009, AXS-One has been bought and sold three times, calling into question its future.

Whatever your situation, you now face the challenge of deciding how to address your email archiving needs in the future and what to do with the terabytes of email stored in your AXS-One archive. You also have to consider how best to decommission your AXS-One legacy email archive and migrate the archive contents. You are concerned about data fidelity and access to archived mail that has been stubbed or shortcut.

**Product Highlights**

**Archive2Anywhere™ AXS-One Edition** is the premier email archive migration solution designed specifically to work with AXS-One. Developed by former AXS-One employees, Archive2Anywhere is fully integrated with AXS-One index and data volumes for faster, more accurate extractions. Archive2Anywhere extracts raw messages and attachments including metadata directly from AXS-One and ensures full legal defensibility. It maintains an item-level audit trail for compliance reporting and preserves complete, original message fidelity for eDiscovery and regulatory requests. Messages are processed directly into your choice of targets with 99.99% accuracy.

**Product Features and Benefits**

- **Multi-threaded, multi-server platform**  
Provides the highest performance and accuracy of all migration solutions
- Extraction off both Lotus Notes and MS Exchange data  
Only solution to extract in parallel Lotus Notes and Exchange data
- **No reliance on AXS-One Web & eDiscovery Portal**  
Faster, more accurate data extractions
- **Full integration with AXS-One Index and Data Access APIs** Ensures full legal defensibility
- **Does not require indexing or data gathering before extraction**  
Begin message extraction within minutes of

installation unlike other solutions that take days or weeks to index before start

- **No data conversions needed**  
Migrated data can be represented as original in regulatory or legal situation
- Reconstitution of Lotus Notes Journal Reports  
Only solution on the market that reconstitutes the Lotus Notes Journal Report
- **Full folder structure and custom MAPI properties reconstruction**  
Provides valuable forensic data not available with other migration solutions
- **Message level chain of custody reporting**  
Legally defensible reporting reduces eDiscovery risk

**System Requirements**

<p><b>Application / Migration Server</b></p>	<ul style="list-style-type: none"> <li>• Windows 2008 R2 Standard / Enterprise 64bit</li> <li>• CPU: 16 cores</li> <li>• RAM: 16 GB of RAM</li> <li>• Application HDD: 40 GB</li> <li>• Archive Disk Storage: Archive grade or better (SATA, SAN or NAS)</li> </ul>
<p><b>Software Requirements</b></p>	<ul style="list-style-type: none"> <li>• Microsoft Outlook 2007 / 2010 / 2013 32-bit</li> <li>• Microsoft .NET Framework 4.5 <a href="#">Click here</a></li> <li>• Disable User Account Control (UAC)</li> </ul>
<p><b>Microsoft SQL Server</b></p>	<ul style="list-style-type: none"> <li>• Microsoft SQL 2005 / 2008 Standard or Enterprise</li> <li>• CPU: 16 cores</li> <li>• RAM: 16 GB of RAM</li> <li>• Disk Storage: Medium performance grade (SATA or SAN)</li> </ul> <p>NOTE: The Archive2Anywhere database can reside on the same SQL server where the email archive database resides. An alternate SQL server can also be used.</p>

**About Archive360**

Archive360 is the leader in email archive migration software, successfully migrating more than 10 petabytes of data for more than 500 organizations worldwide since 2012. Archive2Anywhere™, the company’s flagship product, is the only solution in the market purpose-built to deliver consistently fast, predictable migration rates, with verifiable data fidelity and defensible chain of custody reporting. A global organization, Archive360 delivers its solutions through a network of specialist partners.
