

Regulatory Compliance Storage Solution Based on Microsoft Azure

The cloud has quickly become the preferred option for companies to help reverse the growing issues associated with ever-expanding on-premises legacy email archives for regulatory compliance and eDiscovery as well as unstructured file system storage. For organizations moving to Microsoft Office 365™, migration of legacy email archives and PSTs is commonly identified as the most challenging data to move, closely followed by unstructured file system data. However, moving legacy email archives and other unstructured data carries with it increased legal risk and regulatory exposure if not done correctly.

Introducing Archive2Azure™

Archive2Azure™ is a managed compliance storage solution based on Microsoft Azure. It is delivered as part of the Archive2Anywhere™ platform and is the industry's first solution allowing for complete elimination of legacy email archives and other low touch or 'grey' data including journal folders for regulatory compliance, inactive employee work files and PSTs, file system content, system generated data, and data sets generated from eDiscovery response that cannot be disposed of. With infinite scalability and ultralow costs, Archive2Azure delivers long-term, secure retention and management. Benefits include:

- **Cost-Effective Compliance Storage** – Based on affordable Azure infrastructure, Archive2Azure is offered as a subscription model without start-up or cancellation fees. No additional hardware is required and the professional services installation is free of charge.
- **Real-Time On Demand Indexing** – Archive2Azure is fully integrated with Azure Search and offers search on demand with policy-driven data scoping.
- **Native eDiscovery Functionality** – Archive2Azure provides a secure, long-term legal repository with case management, first-pass culling, tagging, review, and legal production. Integrated with Microsoft's Power BI, Archive2Azure offers a scalable eDiscovery platform with integrated analytics.

Archive2Azure is fully integrated with the Archive2Anywhere migration platform and provides collection, migration, and long term retention/disposition for archived and unstructured data for compliance, legal, and business requirements – all based on the Azure enterprise-grade cloud storage platform. Archive2Azure is the first complete solution to enable companies to fully move to the cloud by eliminating legacy email archives (including journal data), free-range PSTs, and other low-touch unstructured data in a legally defensible manner.

“By using Archive2Azure we were able to quickly and compliantly migrate our unstructured data to a much lower cost cloud infrastructure. Now we have confidence that we can scale as needed to retain all of our valuable data without risking compliance exposure.”

*Tom Gardner, CEO of

Key Features

- **Legacy Archive Elimination:** Migrate and store all archive journal data, legal hold data, and inactive mailbox data in a legally defensible and cost-effective manner.
- **Compliance Storage:** Archive2Azure stores archive content in its original format and provides flexible, fast, and forensically sound search results. Chain of custody context *and* data fidelity are fully maintained.
- **On-Demand Indexing:** Incur index related compute and storage costs only when needed and in the manner you choose. Create custom index templates and target the data subsets you want to search.
- **Native eDiscovery:** Case management, first-pass culling, tagging, review, and legal production is built-in. Integrated Power BI offers a scalable eDiscovery engine with integrated analytics.
- **Journal Data Storage:** Journal envelope data is preserved with 100% data fidelity.
- **Legally Defensible Migration:** All archive content is preserved completely in its original format with full data fidelity and chain of custody. Full audit and item-level reporting is included.
- **Easy Adoption:** No additional hardware is required and the professional services installation is free of charge.
- **Cost-Effective:** Based on affordable Azure 'cool' storage infrastructure, Archive2Azure is offered as a pay-as-you-go pricing model with no startup or cancellation fees.

About Archive360

Archive360™ is the market leader in email archive migration software, successfully migrating more than 12 petabytes of data for more than 500 organizations worldwide since 2012. The company's flagship product, Archive2Anywhere™, is the only solution in the market purpose-built to deliver consistently fast, trouble-free, predictable archive migrations, with verifiable data fidelity and defensible chain of custody reporting. A global organization, Archive360 delivers its solutions through a network of specialist partners. Archive360 is a Microsoft Cloud Solution Provider and the Archive2Azure solution is Microsoft Azure Certified.
