

Store. Secure. Search. Manage

“By using Archive2Azure, we’re able to quickly and compliantly migrate our unstructured data to a much lower cost cloud infrastructure. Now we have confidence that we can scale as needed to retain all of our valuable data without risking compliance exposure.”

-Tom Gardner, CEO of Lion’s Tail

Simplify, Accelerate, and Secure Your Move to the Microsoft® Cloud with Archive2Azure

Compliance Storage and Data Management Based on Azure

The cloud is quickly becoming the preferred option for companies struggling with the growing issue of unmanaged and orphaned data from application retirement projects and departed employees, aging backups, and legacy email archives.

Introducing Archive2Azure

Archive2Azure is the first cloud-managed solution for compliance and long-term data management built on Azure Services that creates a secure and compliant enterprise archive.

Archive2Azure enables organizations to consolidate unstructured, low-touch, grey data sets while lowering the cost and securing Microsoft Cloud for archival storage. This includes legacy email archives, journal folders, inactive or departed employee work files, free range PSTs, file share content, backups, system generated data, and eDiscovery/compliance data sets.

With infinite scalability, Archive2Azure delivers long-term, secure retention and management at a great price.

Scalable

- On-demand, Azure Hot and Cool Blob Storage.
- Store huge amounts of unstructured data to replace aging on-premises archives and file shares.

Highly Secure

- Built on the Azure security platform.
- Stringent AES 256-bit encryption.
- Verifiable data fidelity for audits and regulatory compliance.

Obvious ROI

- Pay only for services your use.
- Retire costly on-premises h/w and s/w.
- Increase productivity.

Archive2Azure fully integrates with *FastCollect for Archives* (formerly Archive2Anywhere), a migration platform that provides collection, migration, and long-term retention/disposition for archived and unstructured data. Based on the Azure enterprise-grade cloud storage platform—these platforms support a wide range of compliance, legal, and business requirements.

Archive360.com

- Consolidate data from across disparate, on-premises data silos into a single managed cloud.
- Retire costly on-premises hardware and applications.
- Reduce data storage and management costs by as much as 90%.

- Deliver low-cost data management capabilities with Archive2Azure plus Azure services.
- Access data tiering (Hot/Cool Blob storage), on-demand indexing, and geolocation and replication
- Fine-tune your organization’s capability to cost model

Archive2Azure is available in three plans:

*Discovery Light = the capability of retrieving data based on user/custodian and date range only.
