

Migration Options

Migrate directly to:

- Microsoft Exchange
- Microsoft Office 365
- Microsoft Azure
- Gmail with Google Vault
- Third party archive

Multi-stream Data Processing

- **PST target**
7.2+ TB per day per server
- **Exchange On-Premise**
5.0+ TB per day per server
- **Office 365**
2.5+ TB per day per server
- **Gmail / Google Vault**
600 GB per day per server (Google API throttle limit)

Migrating from EmailXtender

Your organization has relied on EMC EmailXtender email archiving software to manage your Exchange mailbox size, as well as for compliance and eDiscovery. Today, however, your archiving solution no longer meets your business needs; your organization is moving to a cloud-based email system such as Office 365 or Gmail. Or your archiving vendor may have been acquired or gone out of business, leaving you with unsupported or obsolete technology.

Whatever your situation, you now face the challenge of deciding how to address your email archiving needs in the future and what to do with the terabytes of email stored in your archive. You also have to consider how best to decommission your EmailXtender legacy email archive and migrate the archive content. You are concerned about data fidelity and access to archived mail that has been stubbed or shortcut.

Product Highlights

FastCollect™ EmailXtender Edition is the premier email archive migration solution designed specifically to work with EmailXtender. FastCollect is fully integrated with EmailXtender data volumes for faster, more accurate extractions. FastCollect extracts raw messages and attachments including metadata directly from EmailXtender and ensures full legal defensibility. It maintains an item-level audit trail for compliance reporting and preserves complete, original message fidelity for eDiscovery and regulatory requests. Messages are processed directly into your choice of targets with 99.99% accuracy.

Product Features and Benefits

- **Multi-threaded, multi-server platform**
Provides the highest performance and accuracy of all migration solutions
- **No reliance on EMC Legato / EmailXtender API**
Faster, more accurate data extractions
- **Full integration with EmailXtender / Legato SQL DB and Data Volumes**
Ensures full legal defensibility
- **Zero indexing or data gathering before extraction**
Begin message extraction within minutes of installation unlike other solutions that take days or weeks to index before start
- **EMC EmailXtender Outlook Shortcut (stubs) Management and reconciliation**
All mailbox stubs are found, reconciled, recombined, redirected or deleted with full documentation
Reduces help desk calls and end-user issues
- **Full reconstitution of split, single instanced and compressed messages**
Ensures a legally defensible ingestion into the target repository
- **No data conversions needed**
Migrated data can be represented as original in regulatory or legal situation
- **Folder path and custom MAPI properties reconstruction**
Provides valuable forensic data not available with other migration solutions
- **Intuitive and powerful graphical user interface**
Less time needed for training; faster time to migration
- **Message level chain of custody reporting**
Legally defensible reporting reduces eDiscovery risk

System Requirements

<p>Application / Migration Server</p>	<ul style="list-style-type: none"> • Windows 2008 R2 Standard / Enterprise 64bit • CPU: 16 cores • RAM: 16 GB of RAM • Application HDD: 40 GB • Archive Disk Storage: Archive grade or better (SATA, SAN or NAS)
<p>Software Requirements</p>	<ul style="list-style-type: none"> • Microsoft Outlook 2007 / 2010 / 2013 32-bit • Microsoft .NET Framework 4.5 Click here • Disable User Account Control (UAC))
<p>Microsoft SQL Server</p>	<ul style="list-style-type: none"> • Microsoft SQL 2005 / 2008 Standard or Enterprise • CPU: 16 cores • RAM: 16 GB of RAM • Disk Storage: Medium performance grade (SATA or SAN) <p>NOTE: The FastCollect database can reside on the same SQL server as the email archive database. An alternate SQL server can also be used.</p>

About Archive360

Archive360 is the world’s leading provider of data migration and management solutions for the Microsoft cloud. Since 2012, Archive360 has securely migrated tens of petabytes into the Microsoft Cloud with record-breaking speed, verifiable data fidelity, and legally defensible chain of custody. Archive360’s FastCollect solution is the industry’s first compliance and unstructured data storage and management solution based on the Microsoft Azure platform. Archive360 is a Microsoft Cloud Solution Provider and the Archive2Azure solution is Microsoft Azure Certified. To learn more, please visit: www.archive360.com.
