

Migration Options

Migrate directly to:

- Microsoft Exchange
- Microsoft Office 365
- Microsoft Azure
- Gmail with Google Vault
- Other third party archive

Multi-stream Data Processing

- **PST target**
7.2+ TB per day per server
- **Exchange On-Premise**
5.0+ TB per day per server
- **Office 365**
2.5+ TB per day per server
- **Gmail / Google Vault**
600 GB per day per server (Google API throttle limit)

Migrating from Gwava

Your organization has relied on Gwava Retain Email Archiving solution to archive your Microsoft Exchange, Gmail, and GroupWise mailboxes for businesses purposes as well as for compliance and eDiscovery requirements. However, the Gwava archiving service no longer meets your organization’s needs so your organization has decided to move to a modern cloud-based email system with built-in archiving capability such as Office 365 or Gmail.

You now face the challenge of deciding how to actually move the terabytes of email stored in your Gwava archive. You must also take into consideration how to ensure your regulatory and eDiscovery responsibilities are not compromised putting your organization at additional risk (and cost).

Product Highlights

FastCollect™ Gwava Edition is the premier email archive migration solution designed specifically to work with the Gwava email archiving solution. FastCollect does not rely on Gwava APIs so your data migration will be much faster and more accurate. FastCollect extracts messages and attachments including metadata directly from Gwava Retain and ensures full legal defensibility. It maintains an item-level audit trail for compliance reporting and preserves complete, original message fidelity for eDiscovery and regulatory information requests. Messages are processed directly into your choice of repositories with 99.99% accuracy.

Product Features and Benefits

Utilizes a multi-threaded, multi-server platform
Provides the highest performance and accuracy of all migration solutions.

No reliance on native Gwava APIs
Enables search and filtering of emails by custodian, date range and other criteria.

Message level chain of custody reporting
Legally defensible reporting lowers eDiscovery risk.

Does not require indexing or data gathering before extraction
Begin message extraction within minutes of installation unlike other solutions that take days or weeks to index before start.

No data conversions needed
Migrated data can be represented as original in regulatory or legal situation.

Intuitive and powerful graphical user interface
Less time needed for training – faster time to migration.

Full Folder structure and custom MAPI properties reconstruction
Provides valuable forensic data not available with other migration solutions.

System Requirements

<p>Application / Migration Server</p>	<ul style="list-style-type: none"> • Windows 2008 R2 Standard / Enterprise 64bit • CPU: 16 cores • RAM: 16 GB of RAM • Application HDD: 40 GB • Archive Disk Storage: Archive grade or better (SATA, SAN or NAS)
<p>Software Requirements</p>	<ul style="list-style-type: none"> • Microsoft Outlook 2007 / 2010 / 2013 32-bit • Microsoft .NET Framework 4.5 Click here • Disable User Account Control (UAC)
<p>Microsoft SQL Server</p>	<ul style="list-style-type: none"> • Microsoft SQL 2005 / 2008 Standard or Enterprise • CPU: 16 cores • RAM: 16 GB of RAM • Disk Storage: Medium performance grade (SATA or SAN) <p>NOTE: The FastCollect database can reside on the same SQL server where the email archive database resides. An alternate SQL server can also be used.</p>

About Archive360

Archive360 is the world’s leading provider of data migration and management solutions for the Microsoft cloud. Since 2012, Archive360 has securely migrated tens of petabytes into the Microsoft Cloud with record-breaking speed, verifiable data fidelity, and legally defensible chain of custody. Archive360’s FastCollect solution is the industry’s first compliance and unstructured data storage and management solution based on the Microsoft Azure platform. Archive360 is a Microsoft Cloud Solution Provider and the Archive2Azure solution is Microsoft Azure Certified. To learn more, please visit: www.archive360.com.
