

Migration Options

Migrate directly to:

- Microsoft Exchange
- Microsoft Office 365
- Microsoft Azure
- Gmail with Google Vault
- Third party archive

Multi-stream Data Processing

- **PST target**
7.2+ TB per day per server
- **Exchange On-Premise**
5.0+ TB per day per server
- **Office 365**
2.5+ TB per day per server
- **Gmail / Google Vault**
600 GB per day per server
(Google API throttle limit)

Migrating from MX Logic

Your organization has relied on McAfee (MX Logic) SaaS Email Archiving service to manage your Exchange mailbox size, as well as for compliance and eDiscovery. Today, however, your MX Logic archiving service no longer meets your business needs; your organization is moving to a modern cloud-based email system such as Office 365 or Gmail. Or since Intel has announced end-of-life for MX Logic you are concerned that you will be left with an unsupported or obsolete technology.

Whatever your situation, you now face the challenge of deciding how to address your email archiving needs in the future and what to do with the terabytes of email stored in your MX Logic archive. You also have to consider how best to retrieve your MX Logic legacy email archive and migrate the archive contents to the new email platform.

Product Highlights

FastCollect™ MX Logic Edition is the premier email archive migration solution designed specifically to work with MX Logic. FastCollect is fully integrated with MX Logic APIs for faster, more accurate extractions. FastCollect extracts messages and attachments including metadata directly from MX Logic and ensures full legal defensibility. It maintains an item-level audit trail for compliance reporting and preserves complete, original message fidelity for eDiscovery and regulatory requests. Messages are processed directly into your choice of targets with 99.99% accuracy.

Product Features and Benefits

Utilizes a multi-threaded, multi-server platform
 Provides the highest performance and accuracy of all migration solutions

Uses native MX Logic APIs
 Enables search and filtering of emails by custodian, date range and other criteria

Message level chain of custody reporting
 Legally defensible reporting lowers eDiscovery risk

Does not require indexing or data gathering before extraction

Begin message extraction within minutes of installation unlike other solutions that take days or weeks to index before start

Intuitive and powerful graphical user interface

Less time needed for training – faster time to migration

System Requirements

<p>Application / Migration Server</p>	<ul style="list-style-type: none"> • Windows 2008 R2 Standard / Enterprise 64bit • CPU: 16 cores • RAM: 16 GB of RAM • Application HDD: 40 GB • Archive Disk Storage: Archive grade or better (SATA, SAN or NAS)
<p>Software Requirements</p>	<ul style="list-style-type: none"> • Microsoft Outlook 2007 / 2010 / 2013 32-bit • Microsoft .NET Framework 4.5 Click here • Disable User Account Control (UAC)
<p>Microsoft SQL Server</p>	<ul style="list-style-type: none"> • Microsoft SQL 2005 / 2008 Standard or Enterprise • CPU: 16 cores • RAM: 16 GB of RAM • Disk Storage: Medium performance grade (SATA or SAN) <p>NOTE: The FastCollect database can reside on the same SQL server where the email archive database resides. An alternate SQL server can also be used.</p>

About Archive360

Archive360 is the world’s leading provider of data migration and management solutions for the Microsoft cloud. Since 2012, Archive360 has securely migrated tens of petabytes into the Microsoft Cloud with record-breaking speed, verifiable data fidelity, and legally defensible chain of custody. Archive360’s FastCollect solution is the industry’s first compliance and unstructured data storage and management solution based on the Microsoft Azure platform. Archive360 is a global organization that delivers its solutions both directly and through a worldwide network of partners. Archive360 is a Microsoft Cloud Solution Provider and the Archive2Azure solution is Microsoft Azure Certified. To learn more, please visit: www.archive360.com.
