

Migration Options

Migrate directly to:

- Microsoft Exchange
- Microsoft Office 365
- Microsoft Azure
- Gmail with Google Vault
- Third party archive

Multi-stream Data Processing

- **PST target**
7.2+ TB per day per server
- **Exchange On-Premise**
5.0+ TB per day per server
- **Office 365**
2.5+ TB per day per server
- **Gmail / Google Vault**
600 GB per day per server
(Google API throttle limit)

Migrating from NearPoint

Your organization has relied on the Capax Discovery NearPoint cloud archiving solution to manage and preserve your organization's email for regulatory compliance and eDiscovery for years. However, NearPoint platform's changing ownership is raising concerns about ongoing support while it continues to rely on an aging technology base that no longer meets your business needs. Because of this, your organization has decided the time is right to migrate out of the antiquated NearPoint solution to a modern email archive solution.

Depending on your organization's situation, you now face the challenge of deciding how to address your email archiving needs in the future and what to do with the terabytes of email stored in your NearPoint archive. You also have to consider how best to retrieve your NearPoint legacy email archive and migrate it successfully to the new platform.

Product Highlights

FastCollect™ NearPoint Edition is the premier email archive migration solution designed specifically to work with NearPoint. FastCollect is fully integrated with NearPoint APIs for faster, more accurate extractions. FastCollect extracts messages and attachments including metadata directly from NearPoint and ensures full legal defensibility and regulatory compliance. It maintains an item-level audit trail for compliance reporting and preserves complete, original message fidelity for eDiscovery and regulatory audits. Messages are processed directly into your choice of targets with 99.99% accuracy.

Product Features and Benefits

Utilizes a multi-threaded, multi-server platform
 Provides the highest performance and accuracy of all migration solutions.

Uses native NearPoint APIs
 Enables search and filtering of emails by custodian, date range and other criteria.

Message level chain of custody reporting
 Legally defensible reporting lowers eDiscovery risk and ensure strict SEC regulatory compliance.

Does not require indexing or data gathering before extraction

Begin message extraction within minutes of installation unlike other solutions that take days or weeks to index before start.

Intuitive and powerful graphical user interface

Less time needed for training – faster time to migration.

System Requirements

<p>Application / Migration Server</p>	<ul style="list-style-type: none"> • Windows 2008 R2 Standard / Enterprise 64bit • CPU: 16 cores • RAM: 16 GB of RAM • Application HDD: 40 GB • Archive Disk Storage: Archive grade or better (SATA, SAN or NAS)
<p>Software Requirements</p>	<ul style="list-style-type: none"> • Microsoft Outlook 2007 / 2010 / 2013 32-bit • Microsoft .NET Framework 4.5 Click here • Disable User Account Control (UAC)
<p>Microsoft SQL Server</p>	<ul style="list-style-type: none"> • Microsoft SQL 2005 / 2008 Standard or Enterprise • CPU: 16 cores • RAM: 16 GB of RAM • Disk Storage: Medium performance grade (SATA or SAN)

About Archive360

Archive360 is the world’s leading provider of data migration and management solutions for the Microsoft cloud. Since 2012, Archive360 has securely migrated tens of petabytes into the Microsoft Cloud with record-breaking speed, verifiable data fidelity, and legally defensible chain of custody. Archive360’s FastCollect solution is the industry’s first compliance and unstructured data storage and management solution based on the Microsoft Azure platform. Archive360 is a global organization that delivers its solutions both directly and through a worldwide network of partners. Archive360 is a Microsoft Cloud Solution Provider and the Archive2Azure solution is Microsoft Azure Certified. To learn more, please visit: www.archive360.com.
