

## Data Sheet

# Archive360 Discovery Workshop

# Trends in Email Archiving

Your email archiving environment is changing; your current product no longer meets your needs, your on premise solution has been acquired by another vendor, or the product is no longer supported. Or you are considering cloud-based archiving, maybe as part of a move to Microsoft Office 365.

#### **Migration Considerations**

One of the key migration challenges for organizations continues to be what to do with their existing archives. Some choose to migrate nothing, impacting users and creating potential regulatory and legal issues. Others migrate the entire archive, a costly option that fails to address the needs of users or legal and regulatory teams. Before deciding what do to with your current email archive or commencing a migration project, Archive360 recommends completing a pre-migration checklist. However, in order to do so, you will first need to assess and analyze the contents of your email archive.

#### Archive360 Discovery Workshop

Archive360 has developed its Discovery Workshop to help organizations quickly and accurately analyze their email archives. The Discovery Workshop is based on helping more than 450 organiza-tions worldwide successfully migrate in excess of 10 petabytes of archived data. Within hours you can:

Sele.	Mail	User Name	SAM Account	Mail	All Count	Compressed Siz	Uncompressed Size

Figure 1. Archive Discovery Report

- Accurately assess the size and content of your archive by user.
- Assess and scope with precision messages that have been stubbed (shortcut) by user and date.
- Investigate the Journal mailbox and comprehensively report on Journal data by custodian.
- Evaluate and validate FastCollect for Archives<sup>™</sup> against sample archived messages.
- Make informed decisions regarding your migration strategy and priorities – which mailboxes/ messages to migrate, in what order.

# Archive360 Discovery Workshop Functionality

Archive360 Discovery Workshop is currently available for the following email archives: Autonomy Zantaz EAS, EMC SourceOne, EMC EmailXtender, Mimosa NearPoint, Symantec Enterprise Vault.

Archive Discovery	Stub/Shortcut Discovery in MS Exchange/Office365	Journal Discovery				
User details	Number of stubs/shortcuts per user	Custodian details				
Messages per user	Total size of shortcuts per user	Messages per custodian				
Total size per user	Data range analysis of stubs/ shortcuts	Total size per user				
Total size of archive (uncompressed)		Total size of journal				
<b>Proof of concept</b> Test extraction up to 5 mailboxes or 500 GB to PST, MS Exchange, Office 365, Gmail						

## Archive360 Discovery Workshop Benefits

- Assess your current email archive and test your migration quickly with no risks and minimal up-front investment.
- Reduce archiving costs post-migration through elimination of duplicates, document revisions, etc.
- Accelerate ability to migrate from legacy email archive, reducing costs.
- Stubs understand potential impact on end user experience BEFORE migrating their archived mail.
- Journals migrate only custodians that need to be moved, saving time and costs during and after the migration project.

## About Archive360

Archive360 is the world's leading provider of data migration and management solutions for the Microsoft cloud. Since 2012, Archive360 has securely migrated tens of petabytes into the Microsoft Cloud with record-breaking speed, verifiable data fidelity, and legally defensible chain of custody. Archive360's Archive2Azure solution is the industry's first compliance and unstructured data storage and management solution based on the Microsoft Azure platform. Archive360 is a global organization that delivers its solutions both directly and through a worldwide network of partners. Archive360 is a Microsoft Cloud Solution Provider and the Archive2Azure solution is Microsoft Azure Certified. To learn more, please visit: <u>www.archive360.com</u>.
