File Servers Don't Need to be Digital Landfills

Most companies don't know what files they have lurking in their file systems, or how many, the age, or their sensitivity - and don't have the time or the resources to go through them to find out. This common condition turns file systems into what amounts to digital landfills.

With Archive2Azure for Files, you're

able to quickly identify and analyze, file share data, as well as automatically extend this data into your Azure Cloud in a secure and verifiable manner.

Archive2Azure for Files extends file shares based on policies such as date created, custodian, and last data accessed, among others.

Cost Savings

- Stop buying additional enterprise class file share storage
- Data stored in your low cost Azure Cloud

Information Management

- Configurable retention / disposition policies
- Powerful audit and reports
- A.I. assisted categorization
- Preserve original file fidelity for eDiscovery and compliance

Security and Analytics

- Perform storage analysis and proactively report on file system data
- Provide granular user access controls and data encryption
- Bring Your Own Encryption

Archive2Azure for Files enables you to:

- Utilize your low cost Azure tenancy
- Automatically move little used content including:
 - End-user files
 - Logs
 - Back ups
 - VMs
 - Systems files
 - Mainframe reports
- End-user access via individual access application
