

Ensure Your Salesforce Data is Compliant

Onboard

Validate

Manage

Many companies now rely on the Salesforce platform for their Sales and Marketing activities. However, it can quickly amass a huge amount of data - but does not provide for the archiving of older data for compliance. Rather Salesforce suggests deleting data on a regular basis, a risk for compliance and legal

reasons. Archive2Azure for Salesforce works in conjunction with your Azure cloud to fully archive and manage your company's Salesforce content so there is no need to delete it to make room for additional data.

Regulatory Compliance

- Capture, manage, render, and review Salesforce activities
- Extend your storage instead of risking content deletion
- Create retention policies

Measurable Cost Savings

- Consolidate old Salesforce data into **your** low cost Azure tenancy
- Extend already full Salesforce storage automatically

Search & Analytics

- Configurable, indexable, scalable search
- Intelligent data analysis
- Recall and view records as they were on a specific date(s)

Archive2Azure for Salesforce enables you to:

- Extend or migrate information with 99.9% accuracy into Salesforce
- Use you company's Azure Cloud to eliminate vendor lock-in
- Reduce compliance risk by retaining aging but still needed content
- Conduct legally and regulatorily defensible data movement and storage
- Bring Your Own Encryption Keys for increased security
- Usage-based pricing
- Store Salesforce content in its native format
