### Realize the Full Value of Your Audio and Video Content

Searching for specific keywords in audio and video files is a major headache, if not impossible. The Archive2Azure Media solution indexes audio and video files by spoken word, producing a complete, indexed, searchable transcription. With machine learning technology, it can immediately translate content

into one of 50 plus foreign languages. As a result, audio and video files have more robust, indexable metadata which greatly speeds search and dramatically raises accuracy over that of human search.

#### Cost Savings

- Audio/video search without additional expensive software
- eDiscovery-based review of audio/video files at a 99% cost reduction over that of manual review

#### Automatic Transcription

- Produces a complete, searchable transcript of spoken words
- Search and move precisely to each occurrence of keywords

#### Foreign Language Translations

- Instant translations from or to 50 plus foreign languages
- Reduces time and cost of eDiscovery

Archive2Azure for Media enables you to:

- ✓ Fully utilize audio and video files
- ✓ Reduce the cost of eDiscovery by making audio/video files easily searchable
- ✓ Respond to regulatory information requests much faster
- ✓ Include audio/video files in analytics processes
- ✓ Pay for just what you use with usage-based pricing
- ✓ Store files in their native format

*Image:* Archive2Azure enables organizations to Onboard, Validate, and Manage all structured and unstructured data for comprehensive and low cost information management

#### About Archive360

Archive360 is the world's leading provider of archiving and information management solutions for the Microsoft cloud. Since 2012, Archive360 has securely migrated data into the Microsoft cloud with record-breaking speed, verifiable data fidelity and legally defensible chain of custody. To learn more, please visit: [www.archive360.com](http://www.archive360.com).
